

Frequently Asked Questions

WHO IS THE PERMANENT MAKEUP INTENDED FOR?

- Practically for Every Woman!!!
- For women who are allergic to conventional makeup.
- For women who find it difficult to put on makeup.
- For women who wear contact lenses, have watery eyes, or have eyesight problems.
- For active women who want to look their best even during their workout.
- For the most intimate moments, and for every woman who feels it is important to look beautiful and refreshed 24 hours a day.

IS THE PROCEDURE PAINFUL?

- With my European Permanent Makeup technique you will feel no pain.
- In addition to my painless and quick technique, I apply a local numbing cream.
- Return to work within the hour.

HOW LONG DOES THE PROCEDURE TAKE?

- My European Permanent Makeup technique takes approximately 15 minutes.

HOW LONG WILL MY PERMANENT MAKEUP LAST?

- Between 3 to 5 years, fades away naturally and evenly through the years.

- Long Lasting
- 20 Years Experience

European Permanent Makeup by OFRA

EYEBROWS

- Eyebrows are an important part in the beauty of a woman's face. Misshaped, asymmetric or eyebrows that do not have a befitting shape or color, substantially change the look of the eyes and their size.

Applying makeup to eyebrows with pencils and powders creates an artificial appearance that fades away during the course of the day.

The European Permanent Makeup technique will shape and design your eyebrows using color and intensity most suitable for you. Thus obtaining the desirable look that will blend with the tone of your face, look natural and last for years.

EYELINER

- For women who are sensitive to the ingredients in conventional makeup, women with watery eyes, or who wear contact lenses, and women who find it difficult to apply makeup to the eye area - the permanent eyeliner is the perfect solution.

The lines are made in a delicate way adjacent to the eyelashes so that the eyes are naturally emphasized and beautiful to look at.

LIPS

- With the passing of the years most women lose the color and the shape of their lips, which become pale and thin. The Permanent Makeup technique will improve the look of your lips, so that they appear fuller, of an appealing color, and sensuous at all times.

Enhance your Beauty!

Areola Tattooing

Areola Tattooing Restoration is a specialty area of medical tattooing that requires advanced education, training, and experience. This technique is for women or men that had under gone breast mastectomy surgery, breast augmentation surgery or for cosmetic purposes.

After 20+ years of experience, Ofra Simhon creates natural looking areolas quickly and gently. The breasts look feminine and 'normal' again, thus raising the patient's self esteem and body image. Areola Tattooing Restoration techniques "create" an areola after breast reconstruction, minimize the appearance of scars, or restore an areola to a more natural looking color and shape.

Scar Camouflage

Scars and skin imperfections from surgeries like breast reduction, tummy tuck, face lift, laser treatments and more, can be easily camouflaged using cosmetic tattooing.

Permanent Makeup's ability to break up the scar tissue and color it to better match your natural skin tone provides miraculous results that will build your confidence in your appearance.

Ofra Simhon specializes in this scar camouflage technique which is non painful and looks natural for both men and women.
